

KODAK

DDR4 YUD 401 Specification

Kodak DDR4 YUD401 is a high-performance DDR4 memory module that delivers exceptional stability and robust performance, fully meeting the demands of diverse computing scenarios. Available in multiple frequency specifications up to 2666MHz, this module offers high-speed data transfer capabilities and low latency, effectively enhancing system responsiveness and multitasking efficiency.

Whether for everyday office tasks, web browsing, multimedia entertainment, or light gaming applications, it delivers smooth performance and a consistently stable operating experience. Manufactured with premium memory chips and rigorous manufacturing processes, it is compatible with mainstream desktop platforms. Plug-and-play functionality eliminates the need for complex setup, making it an ideal choice for boosting your computer's performance.
